Art Unit: 2879

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 and 73-78, drawn to an HID, classified in class 313, subclass 25.
- II. Claims 31-69, 71 and 72, drawn to a mounting structure, classified in class 313, subclass 238.
- III. Claim 70, drawn to a getter cap, classified in class 417, subclass 48.
- IV. Claims 79-80, drawn to a method of positioning an arc tube within an HID lamp, classified in class 445, subclass 25.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the HID (as recited in claims 1-20) does not require specific mounting

Art Unit: 2879

structure as recited in claim 32 or 45 or 60 or 71. The subcombination has separate utility such as a CRT, an incandescent lamp, a vacuum tube etc..

Inventions "I and III" or "II and III" or "IV and III" are unrelated/diversified.

Inventions IV and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, it is not required to follow method steps as specifically claimed in claims 79-80 to obtain the HID lamp of claims 1-30 and 73-78.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for

Art Unit: 2879

Group II or III or IV, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Duane Morris on May 28, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
